

BOSCH

**PRESS AND GO.
TEMPERATURE ON HAND.**

GIS 500 Professional

Bosch Professional

GIS 500 Professional

Point and shoot to measure surface temperature instantaneously

WHY THIS

01

Simple

Results at your fingertips with a simple point and shoot trigger button

02

Compact

Easy to carry around thanks to the compact and ergonomic design with carrying pouch

03

Intuitive

Ease-of-use in light of 3-button operation and inverted screen with illuminated technology

HIGHLIGHTS

TARGET USERS : HVAC | Electricians | Automotive mechanics | Construction managers | Painter & floor layers

Infrared Technology

Temperature measurement range between -30°C to +500°C with 3 different emission coefficients for the required working conditions

Intuitive

Ease-of-use in light of 3-button operation and inverted screen with illuminated technology

Simple

Results at your fingertips with a simple point and shoot trigger button

Compact

Easy to carry around thanks to the compact and ergonomic soft grip design with carrying pouch

GIS 500 Professional

Measurement range, surface temperature	°C	-30 to +500
Measurement accuracy, surface temperature	°C	±1.8
Measurement resolution, surface temperature	°C	0.1
Emission coefficient	-	0.95, 0.85, 0.75
D:S ratio	-	12:1
Display size	mm	35 x 25
Illuminated display	-	Yes
Battery runtime	h	9
